

# Creative Leadership Course

## Overview

The greatest influence on an organization's climate for innovation is the behavior of its leaders. This 3 days course focuses on the requisite skills, behaviors and attitudes that enhance personal leadership and fosters cultures where ideas and people flourish. Participants learn what cues and signals they are projecting and how to increase personal ability to motivate, influence and engage others. The workshop examines leaders' attitudes about risk, experimentation, cooperation, and follow through critical to spurring innovation, greater teamwork and results. Participants gain valuable practice, coaching and feedback and emerge as cultivators of creative behaviors in themselves and others.
